PROJECT PERFORMANCE MONITORING

for Microsoft Dynamics 365

- 📍 Enables efficient, detailed and real-time project management

PROJECT PERFORMANCE MONITORING

Optimize your Projects management

Project Performance Monitoring enables effective project management for project managers and executives.

It provides an indispensable set of KPIs (Budget / Actuals / Total Cost / Revenue / Margin). It allows you to reassess forecasts as well as monitor and modify the Estimate-to-Complete estimate.

The global view allows you to drill down from the account/client portfolio to the detailed project.

Benefits

Complementary function to project management allowing for more accurate and real-time project monitoring.

- ◆ Global view on your project key performance indicators

Features

Simplification	Simplified activity creation and activity-based resource planning. Comprehensive project overview on planning, budget, actuals and estimates.
Insights	Improved decision support. Empower project managers to gain actionable insights.
KPI Tracking	Estimate-to-Complete (ETC), Estimate-at-Completion (EAC), project margin, and many more KPIs.
Real time	Data can be viewed dynamically and can be extracted in real time to an external database (BI solution).
Margin Assessment	Evaluate open and closing margins for effective decision-making.
Analysis	Data model is available for BI / Reporting.
