PRESS RELEASE - Lausanne, May 26, 2026

WorkinWith supports Bredin Prat through a phase of its digital transformation

Leveraging its experience in the legal sector, WorkinWith is leading the replacement of Bredin Prat's ERP system with Microsoft D365 Finance & Project Operations, paired with Workin *Legal* 365 a solution designed for lawyers.

Bredin Prat is one of the most prestigious and influential business law firms in Paris.
Founded in 1966, the firm has built a reputation for excellence, initially in litigation before becoming an undisputed leader in mergers and acquisitions (M&A). Combining discretion with intellectual rigor, Bredin Prat maintains close ties with the executive management teams of major corporations, supporting them in complex, transformative transactions.
To support its growth and ensure access to the best solutions, the firm decided to replace its ERP system.

In 2023, WorkinWith partnered with Bredin Prat to tackle this technological and organizational challenge: migrating a legacy system that had been in use for several years to a modern, agile, and high-performance ERP system using Microsoft D365, enabling process standardization.
While overseeing the deployment of D365 Finance & Project Operations, WorkinWith experts also managed the interoperability of the entire system to ensure a smooth and secure migration, as well as providing support to facilitate user adoption of the new system.

The implementation of Microsoft Dynamics 365 enabled process optimization, improved the experience for attorneys, and supported the firm's growth.

A specialized solution created by WorkinWith experts, dedicated to the legal sector, complemented the scope already covered by F&O: Workin *Legal* 365

This unique solution centralizes invoices and manages cash flow through essential features such as E-Billing (Ledes). It streamlines pre-billing and billing, and provides a billing dashboard with additional features that enhance the standard solution.

Thanks to this comprehensive implementation, processes are streamlined, providing fluidity and consistency across the firm—essential in supporting its growth trajectory.

This collaboration served as a major source of inspiration for the experts at WorkinWith. Immersion in the firm's day-to-day operations enabled Workin *Legal* 365 to be enhanced with new strategic features, directly driven by real-world requirements.

By approaching the overhaul of its information system with its characteristic rigor, Bredin Prat turned this challenge into a seamless, secure, and perfectly managed digital evolution. The firm has also established itself as the most visionary and rigorous partner in WorkinWith's history.

About WorkinWith:
